

HOWE's new stacking chair, SixE, is designed to be the most efficient, sturdy, and long-lasting solution to the ubiquitous stacking shell chair. Designed by the British design duo, PearsonLloyd and designed with a high focus on comfort and functionality SixE offers the crucial support and ergonomics for an ideal chair experience.

SixE has a modern yet modest design with an inviting aesthetics that integrates with and enhances architecture. SixE is designed with consideration for the environment. It is easily disassembled, plastic components are marked with identification codes, trivalent chrome plating, and all packaging material is FSC certified.

TESTING AND WARRANTY

SixE is designed for severe contract use. The chair has been tested to EN 15373:2007, level 3 for strength and durability. The chair has also passes the BIFMA X5.1-2011. SixE carries the HOWE 10 year warranty.
