The Kubo Smart party high table is designed for events where flexibility and flow are key. With a height of 110 cm, this high table is ideal for receptions, walking dinners, and networking events. The size of 70 x 70 cm ensures ample space without compromising on visibility. This allows you to create a professional and inviting setting in a short time.

FEATURES

- **Interchangeable tabletop (70x70 cm)**
  Easily interchangeable to match different styles, themes, or event concepts. Tabletop also usable on Kubo Ferro Dinner frames.
- **Efficiently switching between configurations**
  You can effortlessly switch setups within a single event. The Kubo Smart Party integrates smoothly into a wide range of concepts, from informal networking moments to stylish receptions. Thanks to its sleek design, you can easily combine this table with other elements within the Kubo Smart collection.
- **Modular system with smart structure**
  The strength of the Kubo Smart party table lies in its modular system. The aluminium frames are stackable, ensuring compact storage and more efficient transport. The interchangeable tabletops give you the freedom to create a different look for every event. You can easily adjust the style without having to provide extra bases.
- **Built for heavy use**
  The aluminium frames are suitable for both indoor and outdoor use. This makes the Kubo Smart Party particularly versatile in the event and rental sectors. The frames are available in black and white, allowing them to effortlessly complement various styles and concepts. Please note: not every tabletop is suitable for outdoor use.
- **Quick to assemble, strong in presence**
  With the Kubo Smart Party, you work faster and more efficiently. You save time during setup and dismantling, while maintaining a sleek and professional appearance. An ideal choice for those who prioritize flexibility, speed, and a polished overall experience.

*** ALUMINIUM** is highly suitable for outdoor use. It is naturally resistant to corrosion.

- **Natural oxide layer**: aluminium forms a thin protective oxide layer that prevents rust and further corrosion.
- **Corrosion-resistant**: unlike steel, aluminium does not rust, even when exposed to moisture.
- **Lightweight**: significantly lighter than steel, making it easier to handle and install.
- **Weather-resistant**: performs well in rain, humidity, and temperature fluctuations.

POINTS OF ATTENTION

- **Surface damare**: scratche won't cause rust, but can affect appearance.
- **Strenght vs. steel**: aluminium is softer and less rigid.
- **Galvanic corrosion**: avoid direct contact with certain metals (ex. steel, copper) in wet conditions
